

## TESTIMONIALS

*"As an industrial service technician who uses this daily and expects the best... this is it. I love this thing. I can hang upside down off of a crane, lock it on and not have to worry about it falling off."*

– Rick Goggins

*"Easy to use; best device I've purchased for landing gear maintenance."*

– B. Funke

*"I'd gladly trade some of my grease guns for a decent coupler. Oh wait, I did... I bought one of the LockNLube couplers and am now in grease gun bliss. Now that I have the LockNLube coupler I wish the grease interval on the loader wasn't 10 hrs. We need more stuff that needs to be greased daily!"*

– J. Gayman

*"Works great and easy to use. Beats the heck out of trying to find a third hand when using a grease gun and trying to keep the nozzle engaged on the zerk fitting. Wish I had found it sooner."*

– Michael Revelle

*"...worth every penny. I use them exclusively on my service truck grease pump and the shop grease barrel. I WILL NOT EVER go back to using conventional grease couplers. I'd pour gasoline on my head, set it on fire, and have a helper put the fire out with a sledge hammer before I did that."*

# LOCKNLUBE®

## GREASE COUPLER

**Does Not Leak • Locks On – Stays On • Releases Under Pressure**

### THE LOCKNLUBE® GREASE COUPLER

doesn't pop off, doesn't leak, and still easily releases with a thumb lever, even at extreme pressures. Finally, a grease coupler that really works. LockNLube changed the way you connect to Zerk fittings with a patented sliding sleeve to lock the four hardened steel jaws onto the Zerk, creating a leak-free seal.

**Locks on, stays on.** No hands are needed to hold or align the coupler. You have both hands free to use your grease gun and know that grease is going in, not on, the machine.

Stuck-on couplers are a thing of the past. Just push down the thumb lever on your LockNLube Grease Coupler, and it comes right off, even on recessed fittings, and even if there is back pressure in the hose.

The LockNLube Grease Coupler comes in two sizes, Regular and XL. Both have a barrel that is just 1mm wider than standard four-jaw couplers. The XL version is two inches longer, giving you extra reach for deeply recessed fittings.

LockNLube Grease Couplers are long-lasting rebuildable tools. The seal and jaws can be easily

SKU: GC80142

SKU: GC81011

replaced to reduce cost, reduce down-time, and keep your machines up and running. A FREE spare seal kit is included with every coupler (a \$7.85 value). Seal kits last at least 10x longer than traditional couplers and work for both Regular and XL sizes.

**Saves Grease, Saves Time, Saves \$\$\$ and... Saves Your Machines!**

### ADDITIONAL FEATURES

- Two sizes available.
- Works on all metric and SAE specification grease fittings.
- Locks on and frees up both hands to operate your grease gun.
- Uses durable nitrile rubber seal for longevity under high pressure.
- Rated to 10,000 PSI!

## TECHNICAL SPECIFICATIONS

DESCRIPTION	SPECIFICATION
Max Pressure	10,000 psi (690 Bar)
Zerk Compatibility	Fits all DIN and SAE specification zerks (grease nipples)
Coupler Thread	1/8" NPT female thread
Dimensions	<b>Regular:</b> L: 3 1/2 x W: 5/8 x H: 1 7/8 in. L: 85 x W: 17 x H: 43 mm <b>XL:</b> L: 5 3/8 x W: 5/8 x H: 1 7/8 in. L: 138 x W: 17 x H: 43 mm
Diameter (front coupler)	3/5 inches (16 mm) Fits most recessed zerks
Weight	<b>Regular:</b> 4 ounces (100 grams) <b>XL:</b> 6 ounces (165 grams)
Grease Gun Compatibility	Works with all grease gun types – pneumatic, manual and electric
Seal	Durable nitrile rubber seal for longevity under high pressure
Lock-on Mechanism	Four hardened spring steel jaws are resilient under high pressure
Patents	WO 2011/069172
